EDUCATION

Georgia State University

Bachelor of Science in Computer Science

Overall GPA: 3.74/4.00

Relevant Coursework: Principles of Comp Sci I, Principles of Comp Sci II, Theoretical Foundations of Comp Sci, Data Structures and Algorithms, Design & Analysis: Algorithms, Software Development, Web Development, Mobile App, Operating System, Computer Org and Programming

Atlanta, GA

Expected May 2025

PROJECTS

SuitYourself

October 2024

- Developed an AI-driven app that creates personalized outfits by integrating Google Calendar, Weather, and Menstrual Cycle APIs.
- Used Google Cloud Vision to analyze and categorize wardrobe items, providing smart outfit suggestions.
- Incorporated OpenAI-powered chatbot to offer real-time advice and answer wardrobe-related questions.

MealMate

September 2024

- Developed using Flutter, the app allows users to plan their meals for the week and organize their grocery list based on recipes.
- Integrated a favorites feature enabling users to save and quickly access their preferred recipes.
- Enabled users to add ingredients directly to their grocery list from each recipe, simplifying shopping and meal prep.

RELEVANT EXPERIENCE

Dell Technologies

Round Rock, TX

OEM Systems Engineer Intern

June 2024 - August 2024

- Evaluated Dell's Edge portfolio with AI inferencing to pinpoint key gaps, providing strategic insights that shaped product development and improvements.
- Collaborated with Product Group (PG) and Sales Engineering (SE) teams to gather and analyze data, producing detailed forecasts for future product business cases that enhanced the precision of strategic planning.
- Developed an \$800M+ business case to address product gaps for compute workloads at the edge, leveraging customer feedback to drive actionable solutions.

Accenture & Girls Who Code

Remote

Tech Consultant Participant

May 2023 - June 2023

- Completed a rigorous three-week immersion program at Accenture, with a focus on advanced technical training and professional development, resulting in strengthened industry knowledge and technical skills.
- Gained in-depth insights into consulting roles and responsibilities, deepening understanding of industry standards and best practices.

ON CAMPUS AND COMMUNITY INVOLVEMENT

Girls Who Code

Atlanta, GA

Member

May 2023 - Present

- Actively volunteers in a nonprofit organization dedicated to promoting STEM education for women
- Contributes to closing the gender gap in tech and empowering women on campus to strengthen the community

Codepath AND101 Course

Remote

Student

August 2023 - October 2023

- Completed CodePath's AND101 course, mastering Android development with Java and Kotlin, including key topics like UI/UX design, activity management, and data storage.
- Designed and developed a fully functional Android app, integrating animations and optimized UI elements to enhance the overall user experience.

SKILLS

Coding Languages: Python (NumPy, Pandas, Matplotlib), Java, SQL, HTML, CSS, Javascript, Kotlin, Flutter,

Programs: Figma, Adobe Illustrator, Adobe Photoshop
